

The special livery for the new Bedford - Bletchley Class 230 units has been unveiled at Vivarail's depot at Long Marston

Aug 22, 2018 11:05 BST

New Marston Vale livery revealed as contract for new trains is signed

A special livery for London Northwestern Railway services between Bedford and Bletchley has been revealed.

This comes as the contract for the supply of the upgraded Class 230 units from Vivarail is officially signed.

The trains will start running on the line in December 2018, following their extensive overhaul at Vivarail's Long Marston depot in Warwickshire.

The first of the new trains (230003), will begin testing over the next few weeks. Units 230004 and 230005 will be following shortly.

The contract for the supply of the trains has now been signed. This is a significant stage of the project, showing commitment from both between West Midlands Trains and Vivarail.

Jan Chaudhry-van der Velde, managing director of West Midlands Trains said, "I remember these trains from when they were on London Underground, but looking around the units there's so much new equipment on board that they look and feel like brand new trains. Vivarail has done a great job and these trains are an ideal match for this important local service.

"Our new London Northwestern Railway livery is appearing more and more prominently across the network, and we are proud to be able to share this bespoke version of design for the Marston Vale route."

Adrian Shooter, CEO of Vivarail said, "Both Vivarail and West Midlands Trains have worked tirelessly to bring this to fruition and I am delighted to show what we have achieved. Everyone is pleased with the look and build quality and I'm very proud of the work my team has done. I am particularly impressed with the London Northwestern Railway livery and their interior designs – they certainly showcase the Class 230 and I think will be well received by Marston Vale's passengers.

"It is a proud day for me to see this first train roll out of our workshops and I am looking forward to seeing it at Bletchley depot in the near future."

Vivarail will be supplying three two car trains to operate between Bedford and Bletchley. The trains have undergone extensive improvements and will include universal access toilets, USB sockets and modern 'airline' seating. The trains will be supplied as diesel units, with the capability to convert to battery units in the future.

Vivarail has designed these to be quiet, green and clean, using automotive standards to reduce emissions and noise. The train's engines will automatically cut-out in stations to ensure a comfortable passenger environment and further cut emissions. The lightweight aluminium bodyshell also means the train uses less fuel and the superior acceleration will ensure

swift and comfortable journeys.

The trains will be maintained at the Bletchley depot, creating new jobs in the local area.

About Vivarail

Vivarail was formed in 2012 to produce a new type of rolling stock designed specifically for regional routes: the Class 230.

The company is headed by Adrian Shooter CBE, previously Chairman of Chiltern Railways. Vivarail is based at a rail-connected site in central England with full manufacturing facilities and a 3km test track.

Vivarail is privately funded.

About the Class 230

The Class 230 is a cost-effective solution to the need for new rolling stock and is designed to keep both upfront and running costs to a minimum. It uses the best of modern technology and is specifically designed to appeal to passengers and operators alike. Innovative systems and high tech equipment, such as the advanced RCM system, ensure the trains are able to be customised to suit different route requirements.

The trains are designed to accept power modules which can be diesel, battery or, in the future, hydrogen fuel cells. Vivarail is leading the UK market in battery technology and has built the UK's first modern production battery train which will be fully approved and ready for passenger service in summer

2018.

The D-Train meets all current standards up to and including the 2020 PRM-TSI regulations.

About West Midlands Trains

West Midlands Trains operate both West Midlands Railway and London Northwestern Railway services.

- **London Northwestern Railway** services operate between Liverpool and Birmingham, and on the West Coast mainline to and from London Euston.
- **West Midlands Railway** services operate to destinations across the West Midlands via Birmingham New Street.

For more information on these services visit westmidlandsrailway.co.uk or londonnorthwesternrailway.co.uk

The West Midlands Trains franchise started on 10 December 2017 and will run until 2025/26.

West Midlands Trains operate 1,300 services a day, manage 150 stations and provide over 70 million passenger journeys a year. Over the course of the franchise, West Midlands Trains will be investing £1 billion into the rail network to deliver new trains, improved routes and station upgrades. This will include 400 new train carriages across the network and space for an extra 85,000 passengers into Birmingham and London at peak times.

The franchise is a joint venture between Abellio (70.1% share) and East Japan Railway Company / Mitsui & Co., Ltd (29.9% share in a 50:50 split). Abellio is the international passenger transport subsidiary of the Dutch national railway company, Nederlandse Spoorwegen. In the UK, Abellio operate ScotRail and Greater Anglia train services, Merseyrail services in a joint venture with Serco and buses through Abellio London. For more information visit www.abellio.com
